

## Your gateway to the international glass industry

Data from glass producers worldwide:

- Production capacities in regions and countries
- Furnaces, furnace types, suppliers, years of construction
- Glass types and sub-types, products

Moreover, find financials from global players, production data, demographic data for countries as well as import and export data and a forecast about future glass consumption in all global regions.

### What's in it for you?

glasssglobal Plants provides you with the access to these data. Find potential customers according to your personal selection within a minute, find companies to approach, display them on a map and contact them directly.
